Summary

Full-Stack Developer with hands-on experience building responsive web applications and REST API based systems using Java, Spring Boot, React.js, Node.js, and JavaScript. Strong understanding of object-oriented programming, database fundamentals, authentication workflows, version control, and Agile development practices.

Technical Skills

Languages: Java, JavaScript, Python
Backend: Java, Spring Boot, RESTful APIs, Node.js, Express.js
Frontend: React.js, HTML5, CSS3, Bootstrap
Database: MySQL, JSON-based persistence
Tools: Git, GitHub, Postman, VS Code, Netlify, Vercel

Experience

Operand Technologies and IT Solutions LLP

Jun 2022 – Aug 2022

Web Development Trainee

Latur, Maharashtra

- Built and optimized responsive React.js applications, improving page load performance by 25% using lazy loading and code splitting techniques.
- Worked on reusable UI components, frontend routing, and API integration to improve application maintainability and user experience.

Unified Mentor

Dec 2024 – Jan 2025

Web Development Intern

- Developed and deployed responsive web applications using React.js, JavaScript, HTML5, CSS3, and modern frontend development practices.
- Tested application flows across desktop and mobile screens, improving layout consistency and usability.

Projects

AI Career Copilot – AI Career Guidance Platform

JavaScript, Node.js, REST APIs, HTML, CSS, JSON

- Built a full-stack career guidance platform that analyzes resume content, calculates ATS compatibility, identifies skill gaps, and generates personalized learning roadmaps.
- Implemented backend REST API endpoints for authentication, resume analysis, interview question generation, answer feedback, roadmap creation, and job recommendation workflows.
- Designed an ATS-friendly scoring engine using section detection, keyword matching, role-based skill comparison, and actionable feedback generation.
- Developed a responsive dashboard interface for users to register, analyze resumes, view matched and missing skills, practice interviews, and receive job recommendations.

Cryptocurrency Tracker Web App

React.js, Node.js, Express.js, CoinGecko API, Netlify

- Built a full-stack cryptocurrency tracking platform that fetches and displays real-time price, market capitalization, and trading volume data using REST APIs.
- Developed dynamic React.js interfaces with live search, filtering, responsive UI, and interactive market data visualization.
- Integrated third-party API data and handled asynchronous state updates to deliver accurate market information to users.

Education

AISSMS College of Engineering, Pune

2023 – 2026

B.E. in Computer Engineering

CGPA: 8.89 / 10

Puranmal Lahoti Government Polytechnic, Latur

2020 – 2023

Diploma in Information Technology

89.38%

Certifications

- Oracle Cloud Infrastructure (OCI) Foundations Associate
- IBM Introduction to IBM Storage and Cloud
